

DECLARATION on the support for the national election monitoring mission conducted by Promo-Lex Association

21 January 2019

DECLARATION on the support for the national election monitoring mission conducted by Promo-Lex Association

The Civic Coalition for Free and Fair Elections expresses its support for the national election monitoring mission conducted by Promo-Lex Association, rejecting the repeated denigrating attacks on the mission. During several electoral campaigns of different levels, which they have monitored in the country and abroad, the experts of the observation mission have demonstrated that they have the necessary qualifications in the field of election monitoring.

The findings and conclusions provided in two reports on the mission (reports [no. 1](#) and [no. 2](#)) represent a consistent statement of facts and phenomena observed and reported in the course of several electoral campaigns, but which have not yet been settled. The approaching event of the parliamentary elections of 24 February 2019 only highlights harmful behaviours and practices that have been rooted over the years instead of being eliminated.

The issues to which the detractors of the observation mission refer [see the [press release of the Democratic Party of Moldova](#) and [statement of Jan SOR](#) (min. 16:00-16:50)] appear not because of the lack of any methodology or subjective attitude of the experts, but because of some confusion deliberately created by those who hold the levers of power. Namely they accept the instant practice by the political parties and their distinguished members of political activity, business, charity, media and propaganda, religious activities, etc. This kind of interspersed activity creates such a confusion that even the most perfect methodology cannot clear out.
