

Promo-LEX Association has a number of announcements to make, which are equally important for the organisation and the human rights community

Dear Friends,

As February begins, Promo-LEX Association has a number of announcements to make, which are equally important for the organisation and the human rights community.

Promo-LEX Association undergoes the first implementation stage of an extensive managerial and administrative reform, as a result of which certain changes were already made and others will gradually be put in practice.

During its first 18 years of work, Promo-LEX Association made history by protecting and fighting for human rights in the Republic of Moldova, including the transnistrian region, which was an 'epoch' of multiple achievements and remarkable success.

Alexandru Postica, attorney at law, first Director of the Human Rights Program, had a special role in and contributed significantly to the development of Promo-LEX Association. As of 1 February 2021 he does not hold this position any more. Nonetheless Alexandru Postica will stay with and be part of the Promo-LEX team as a manager responsible for research and litigation. Moreover, he will be the first advisor of the Executive Director, with the right to represent the Program and the Association at national and international level.

Thus as of 1 February 2021 the Human Rights Program Director position will be held by Vadim Vieru, attorney at law, who successfully joined the Promo-LEX team in 2010, being still a student at that time. Vadim Vieru is a dedicated and dynamic person, whose professional development has been ascending, who has proven competence at work and obtained recognition and appreciation among colleagues and partners.

We are confident that during his first term in the capacity of Human Rights Program Director, Vadim Vieru, attorney at law, will strengthen, represent and lead professionally the team, which will keep achieving remarkable results.

The entire Promo-LEX team wishes both its colleagues the best of luck, health and strength.
