

Promo-LEX Continues the Management Reform Process

Dear friends,

Promo-LEX Association continues the management and administrative reform. This time, we would like to announce some changes in the management team of the Monitoring Democratic Processes Program. The success of Promo-LEX hinges on its human resources, including on the recognition of the team's merits and capacities. We believe that changes in the management team must be implemented periodically, so as to ensure the continuous development of the Program.

Since 2009, Pavel Postica has successfully led the Monitoring Democratic Processes Program team and thanks to his managerial and analytical skills, he managed to create and guide a team of experts that monitored 20 national Moldovan elections so far.

Starting with 1 April 2021, the leadership of Monitoring Democratic Activities Program will be taken over by Nicolae Panfil, who has successfully coordinated and supervised the Program activities for 8 years. Gaining the appreciation of our colleagues and partners through his efforts and perseverance, Nicolae Panfil will continue to present a clear view of the further development of the program and the team. Pavel Postica will remain part of the Promo-LEX team and will further contribute to delivering quality products and services within the organisation.

The entire Promo-LEX team wishes both colleagues health and new achievements.
